

Bluegiga Statement on REACH Regulation

European Union (EU) has implemented regulation 1907/2006 REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) effective from June 1, 2007. REACH is mostly affected on chemicals manufacturers but also users of chemicals have responsibilities.

Within REACH regulation, Bluegiga Technologies Oy is considered as a Downstream User. There is no requirement of registration the substances or articles by Bluegiga.

As a downstream user our responsibility is to communicate the information about the Substances of Very High Concern (SVHC) along the supply chain. The list of SVHC can be found from the web page:

http://echa.europa.eu/chem_data/candidate_list_table_en.asp

We have analyzed the list of substances after the latest additions on 16.6.2014. According to our current knowledge our product range including packaging materials does not contain substances listed on SVHC list or annexes. We will continually follow-up the situation and inform about the changes when needed.

On behalf of Bluegiga Technologies Oy,

A handwritten signature in black ink, appearing to read "Mikko Sojonen", written over a horizontal line.

Mikko Sojonen
Manager, Sourcing & Quality
Bluegiga Technologies Oy
